FlexFit™

Field-Adjustable Interior Aluminum Door Frame

Fast, Flexible Installation for Real-World Conditions

The FlexFit™ Field-Adjustable Aluminum Door Frame is designed to save job site time and eliminate installation challenges caused by varying wall thicknesses and imperfect interior openings.

Its precision-engineered aluminum design delivers the strength and long-lasting performance expected from Special-Lite®, with the flexibility to adapt on-site.

Ideal for restaurants, convenience stores, retail, and commercial offices, FlexFit™ installs quickly—whether replacing hollow metal frames or completing new construction.

- Available in 1.35" and 2.25" trim widths to cover wall damage and ensure a clean finish.
- Snap-on stop trim ensures a crisp, architectural appearance with no exposed fasteners.
- Stock finishes are Clear and Black Anodized; custom options available.

Field-Adjustable Design

Easily adapts to wall thicknesses from 4" to 7.5" with adjustable throat depths; four models to choose from.

Fast Installation

Ships assembled or knock-down with a complete anchor pack; installs with standard tools.

Durable Aluminum Construction

Will not rust, rot, or deteriorate—and never needs repainting.
