# Custom Entrance Solutions for Restaurant and Retail Facilities

## Beautiful enough for the front door

Only Special-Lite offers custom entrance system solutions that provide the design flexibility you want for restaurant and retail applications, and the long life and low cost of ownership you need. We manufacture a variety of door and frame types and styles so your customer entrances can support your branding. Since every entrance system we make is made to order, odd size or oversize doors, custom vision lites or unique hardware are never a problem.

### **Welcome your guests in your own unique style**

Special-Lite® Doors are available in a variety of types and styles to suit any architectural motif. Our SL-14 Medium Stile and SL-15 Wide Stile Monumental Doors can handle even the heaviest traffic in conventional storefront installations. The SL-16 Aluminum Flush Door can be anodized or painted and outfitted with custom vision lites for a unique contemporary look.

Traditional architecture calls for our AMP Wood Grain Doors in flush or colonial 6-panel styles to provide the appearance of a wood door with the performance of a heavy-duty, moisture-resistant commercial door. To complete the package we have aluminum framing products that are ideal for new construction or entrance replacement.

## Tough enough for the back door

Special-Lite SL-17 FRP Flush Doors are tough enough for employee and vendor entrances on the back of the house. They feature Fiberglass Reinforced Polyester (FRP) face sheets that are colored-through and amazingly scratch, scuff, impact and stain resistant, so they are easy to clean and will stay looking new for years. A poured-in-place urethane core provides excellent thermal insulating performance, and aluminum stiles, rails and hardware reinforcements provide corrosion resistance and secure hardware attachment, so they'll give you many years of trouble-free service.

# Enhance Safety, Security and Functionality

We offer a number of custom features that can improve the functionality of our doors to enhance safety and security for your staff.

## Bi-Fold Unit

For improved ventilation we can add bug-screened louvers or a screened bi-fold shuttered vision lite to allow fresh air in while keeping doors closed and locked.

## Security Window

Add a vision lite peep door to allow staff to confirm the identity of callers at the back door before opening it, without allowing a continuous view inside the building.

## Internal Proximity Card Reader Prep

Proximity card signals pass unhindered through the face of our FRP doors, so low profile card readers can be installed inside the door, providing discrete access control and protecting the card reader unit.

## Adjustable Bottom Brush

Reduce the potential for vermin to enter the building by adding our Adjustable Bottom Brush to the bottom of the door. Its dual brushes can be adjusted to provide a tight seal.

Customization to support your brand.  
Performance to support your business.

# Custom Entrance Solutions for Restaurant and Retail Facilities

## Special-Lite Your single source for custom solutions

To allow very large objects to enter your facility for special promotions, we can engineer a custom opening with either operable framing sections containing storefront customer entrance doors, or extra-large bi-folding monumental doors integrated into sections of curtainwall. Just tell us what you need, and let our engineers create a custom solution.

### Toilet partitions as tough as our doors

There is no rougher application for toilet partitions than schools, so that is exactly the environment we designed our partition system to handle. They're built with the same materials and processes as our FRP Doors, making them the most abuse-resistant system on the market. Rest assured that they're strong enough to stand up to your customers.

### Meet all your entrance needs in a single source

Special-Lite has built a reputation for meeting the unique entrance needs of restaurant and retail establishments. We can provide a complete package of exterior doors and frames for every opening in the building, and keep your construction or renovation schedule on track with short, reliable lead times. And we stand behind our products with the best warranties and support in the industry. Whether you're replacing one door or doing a chain-wide update, we are ready to be your single source for custom solutions.
