

# INTERIOR FIRE-RATED DOORS

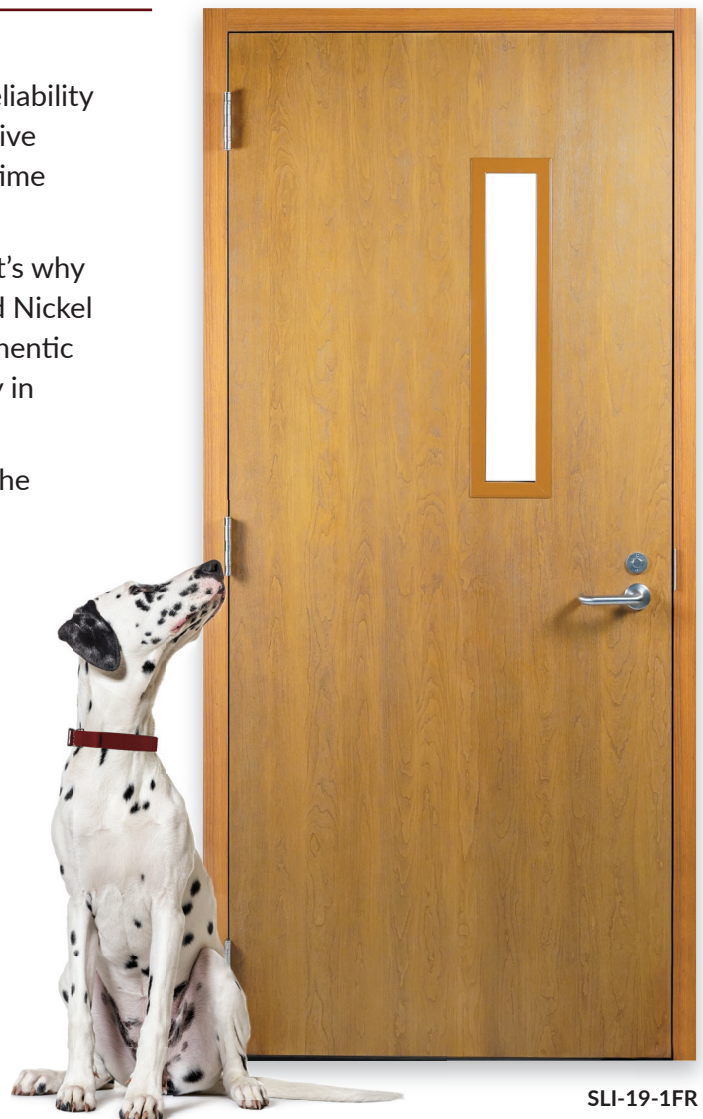

Special-Lite brings you the durability, safety, and reliable performance of our exterior doors, now in an interior 20-minute door. More durable than wood, plastic laminate, and other less resilient materials, FireSafe20 doors offer you longer life and less maintenance while looking beautiful.

Perfect for dormitories, long-term care facilities, and a host of other applications, Special-Lite's fire-rated doors both complement the design of your building while adhering to Life Safety Code requirements.

## Benefits

---

- The use of resilient materials and carefully engineered features ensure durability and reliability in all our products, helping you avoid extensive repairs and replacement costs—Saving you time and money.
- The details are essential to your design. That's why our contemporary wood grain uses patented Nickel Vapor Deposition (NVD) Technology for authentic woodgrain replication. Beauty and durability in every door.
- Designed for highly abusive environments, the FireSafe20 door features standard painted fiberglass door edges, an optional stainless-steel edge is also available.
- All of our fire-rated doors are smoke-rated with the use of the provided frame-applied intumescent and smoke seals.
- One source for all your door needs—from safety-rated doors to customized front entrances to storage closet doors, we have a solution that perfectly matches your needs and code requirements.
- We stand behind all of our products with a 10-year 100% parts and labor warranty.

3' 0" X 7' 0"	4' 0" X 7' 0"
3' 0" X 8' 0"	4' 0" X 8' 0"

## Framing Options

- **Omega Interior Aluminum Framing:** Complete your fire-rated entrance without sacrificing aesthetics. This aluminum interior framing is designed with a minimal appearance and several trim options, perfect for office applications.
- **FR-Series Fire-Rated FRP Framing:** Say goodbye to rust and denting with the toughest fire-rated framing in the industry. Corrosion-free, dent-resistant, and easy to clean: our pultruded fire-rated framing stands up to the most demanding environments.
- **Insert Frame and Capping System:** Preserve older structures while reinforcing the longevity of your entrances. The Insert Frame and Capping System can be used with any of our fire-rated doors when used with a fire-rated hollow metal frame. This system provides a means of returning openings to plumb and square to prepare the entrance for new doors.
- **Hollow Metal Framing:** When hollow metal framing is required, Special-Lite has you covered. Ordering your doors and frames from the same manufacturer ensures the perfect fit for your doors and frames.
