# Privacy Vision Panel Product Data Sheet

Privacy Vision Panel handles are available in single- or double-sided operation. Handles are machined from solid 316-grade stainless steel.

Privacy Vision Panels are fully sealed glazed units with an interstitial operable blind. Using the latest glass technology, they provide a vision panel solution designed for healthcare environments. Privacy Vision Panels are 1" thick for glazing in our fiberglass or aluminum vision lite kits.

Our fiberglass doors and frames are engineered and manufactured to be well-suited for environments that experience frequent sterilization. Add Privacy Vision Panels for an easy to clean, adjustable privacy glazing option.

Standard Privacy Vision Panel Sizes		
Code	Glass Size	Description
