

Pultruded Fiberglass Doors and Frames (AF-100) remain corrosion-free for life, unlike hollow metal doors.

Solutions for Aquatic Facilities

Rust-Free Poolside Doors, Frames, and More

Keep your facility looking great with
Special-Lite Fiberglass Doors and Frames!

If you have a pool area in your commercial building, you know how important it is to have doors and frames that can withstand the constant exposure to moisture and harsh chemicals that can damage traditional materials. Special-Lite Fiberglass Doors and Frames are made with the highest quality materials and are engineered to withstand the harsh and humid conditions typically found around pools.

Aquatic Facility Challenges

Doors, frames, and partitions in aquatic or pool facilities face a variety of challenges due to this unique environment

- 1. Water Resistance:** Water damage and mold growth can occur on surfaces that are not designed for a moist environment.
- 2. Corrosion:** This wet and often humid environment can lead to the corrosion of doors, frames, and bathroom partitions.
- 3. Cleaning & Maintenance:** Your facility requires regular chemical treatment, cleaning, and maintenance to ensure proper function and hygiene. Surfaces need to allow for easy cleaning and sanitizing. Doors, frames, and partitions often require frequent maintenance in moisture-prone areas, including painting.
- 4. Security & Access Control:** Pool facilities require strict access control to ensure safety. Doors must provide adequate security to prevent unauthorized access to restricted areas such as staff-only areas and equipment rooms.
- 5. Safety:** Damaged or difficult to operate doors can pose a safety risk to patrons and employees, especially in the event of an emergency.

Corrosion-resistant poolside Pultruded Fiberglass Doors (AF-100).

Choose Solutions Designed for Your Facility

These challenges highlight the importance of choosing high-quality doors and frames that are specifically designed for aquatic facilities, where traditional materials deteriorate quickly. By working with experts who understand these unique challenges, you can ensure that your doors provide reliable performance, security, and safety while meeting your hygiene, water resistance, and access control needs!

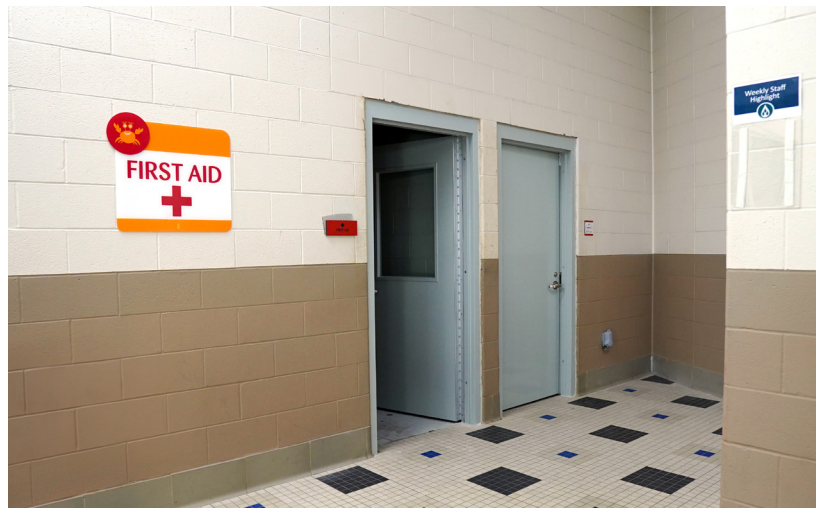

Doors & Frames for Aquatic Facilities

Designed to withstand the harsh and humid conditions typically found around pools, Special-Lite Fiberglass Doors and Frames are made with high-quality materials that resist moisture and water damage. Durable and able to withstand heavy use and abuse, they provide security and easy access while keeping the water where it belongs. Whether you're planning a new pool facility or renovating an existing one, our Fiberglass Doors and Frames are the ideal choice for any aquatic facility.

10 Reasons to Choose Special-Lite Fiberglass Doors and Frames:

- 1. Water resistance:** Fiberglass doors and frames are highly resistant to moisture and water damage. This makes them ideal for use in humid and wet environments, such as pool areas.
- 2. Corrosion resistance:** Fiberglass doors and frames will not rust or deteriorate, even with prolonged exposure to chemicals such as chlorine, ensuring a safe and secure environment for all.
- 3. Durability:** Our doors and frames are incredibly durable and can withstand heavy use and abuse, ensuring longevity and reliability in your commercial building, even in high-traffic areas.
- 4. Low maintenance:** Fiberglass doors and frames require minimal maintenance compared to other door and frame options, reducing ongoing costs and upkeep for your facility.
- 5. Hygiene:** Our doors and frames are designed with hygienic materials and finishes that are easy to clean and sanitize.
- 6. Energy-efficiency:** Fiberglass doors and frames have excellent insulation properties, keeping your facility comfortable year-round while reducing energy usage.
- 7. Safety:** Designed with safety and reliability in mind. Our doors and frames are also available in a variety of ratings to meet building and life safety code standards.
- 8. Security:** Engineered to be heavy-duty, ensuring security when locked, yet remaining lightweight and easy to operate. They're reinforced for secure hardware attachment and compatible with access control systems to prevent unauthorized access.
- 9. Customization:** Special-Lite Doors and Frames are crafted to fit your project requirements! Choose from various colors and finishes to match the design of your commercial building.
- 10. Warranty:** Experience peace of mind with our no-hassle warranties. We stand behind our products!
