

BATHROOM PARTITIONS & MORE

RESTROOM SOLUTIONS

We're more than just a door or partition company:
Your total solution for areas that require privacy,
durability, and resistance to environmental factors—
human and otherwise.

SOLUTIONS

for your restroom challenges

Special-Lite® Restroom Solutions are the ideal choice for restroom facilities expected to endure heavy use and frequent abuse— such as K-12, higher education, athletic facilities, arenas, retail spaces, restaurants, and other public facilities.

Our partitions, doors, and frames are remarkably durable; we designed them to endure the mistreatment and abuse commercial facilities experience. They're also perfect for corrosive environments that quickly degrade metal partitions like those found in and around locker rooms, pools, showers, and spas.

Create a safe, clean environment

Bathrooms, locker rooms, shower stalls, dressing rooms, and other spaces need to stand up to heavy use, moisture, and more. All while looking their best and remaining clean and sanitary for the health, safety, and happiness of building occupants. When these high-traffic areas appear clean and well-maintained, they tend to stay that way. When people respect your facilities, everyone wins.

Simplify reaching these goals with our durable products that are easy to clean and sanitize, and do not support the growth of mold or development of rust. All of our restroom products are also GREENGUARD Certified.

Special-Lite's partitions, doors & frames outperform the alternatives— from the inside out! *How?*

- They are built to resist mold and decay; minimal moisture-trapping crevices
- By utilizing a core material that is immune to moisture penetration and retention
- Resistance to UV light, harsh cleaners & chemicals with superior cleanability thanks to our integral finishes and factory-applied coatings

SpecLite 3® FRP Bathroom Partitions

Special-Lite® Bathroom Partitions are built to last. Engineered as tough as our legendary doors and made with the same materials, they deliver years of dependable service with minimal maintenance while looking great. Put an end to constant painting, repairs and budget-busting replacements.

Hang Them and Forget Them

The first difference you'll notice with our partitions is that they are lighter than a comparable steel system. This puts less stress and strain on your hardware and wall attachments, not to mention installation crews, and increases overall durability. Don't think less weight means they're lightweights; our partitions are heavy-duty and will stand up to prolonged abuse, just like our doors.

- Aluminum perimeter stiles and rails make the panel lightweight, flexible, and corrosion-resistant.
- Mitered corner joints with corner clips create a strong infrastructure with no welds to break.
- Foamed-in-place closed-cell polyurethane core binds panel edges and face sheets.
- Through-colored dent-, scratch-, and stain-resistant SpecLite 3® FRP face sheets.
- Face sheets are secured by integral reglets on panel edges for a truly flush surface.

Choose from these color options & more:

Peek-Proof: NO SIGHT LINES

Our partitions are designed with privacy in mind. A continuous hinge and continuous doorstop combined with the use of a full-length corner and wall bracket create a peek-proof compartment.

Resists
GRAFFITI

Our exclusive SpecLite 3® FRP technology provides a sealed surface that endures use and abuse over time, and even repels graffiti! Remove graffiti quickly with just a wipe— the best way to discourage future vandalism.

Resists
CORROSION

We build our Bathroom Partitions with resilient materials like aluminum and FRP that cannot rust or rot. With a moisture-proof construction that is easy to clean, you can even use our partitions in your shower stalls.

Tested and Proven
DURABILITY

Our products have been put to the test in some of the most challenging real-world applications, and endure for decades. Our bathroom partitions bring the same proven durable construction to one of the most challenging rooms in your building.

APPLICATIONS

- Toilet Partitions
- Urinal Screens
- Shower Stalls
- Changing Rooms

Peek-Proof Restroom Stalls and Compartments

Our restroom stall doors are completed with an innovative, durable continuous hinge and continuous door stop. Combined with full-length corner and wall brackets, this design provides structural integrity and makes our stalls peek-proof with zero sight lines into the stall.

Our continuous hinge for ADA-compliant stalls provides more than just modesty, allowing emergency access to the stall. This unique design also features a gravity-close function.

Win the Fight Against Restroom Vandalism

The durability of our partitions extends all the way to the floor, with extruded aluminum pilaster shoes—a Special-Lite exclusive—that are anodized after fabrication to provide excellent resistance to corrosion and abuse.

All fasteners are tamper-resistant to discourage mischief. The FRP face sheets are through-colored, so scratches, if any are made, will be less obvious than with traditional partition panels.

1

Doors and Frames

More than Just Entrances

Using conventional walls for your restroom, shower, or dressing room? The corrosion-resistant and easy-cleaning properties of the Special-Lite Doors you know and love make them an excellent choice for restrooms and showers. Beyond entrances, Special-Lite Doors and Frames outperform other doors in areas prone to moisture, chemicals, frequent cleaning, heavy traffic, and abuse.

Design Matters

You don't have to choose between aesthetics and utility. Special-Lite Doors and Frames allow you to create a product unique to your facility. Meet your design and performance needs with multiple door face textures, standard and custom finishes and construction types.

2

Choose from:

Fiberglass Doors

The champions of corrosion resistance, fiberglass doors are impervious to moisture. Often used in clean rooms, these doors are easy to keep sanitary. Fiberglass will never rust, rot, or corrode.

Pultruded Fiberglass Doors

Smooth Painted

Special-Lite makes the only pultruded completely sealed heavy-duty fiberglass door, featuring a closed cell foam core. Complete the doorway with heavy-duty pultruded fiberglass framing.

Composite Fiberglass Doors

Smooth Painted | Pebble Grain | Sandstone | Rustic Wood Grain | Contemporary Wood Grain

Constructed with pultruded fiberglass stiles and rails and bonded FRP face sheets, with EPS foam or polypropylene honeycomb core. Lightweight and economical.

FRP Doors

Our FRP Doors are known for being tough and low-maintenance in abusive environments, while remaining light-weight and easy on hardware. Not only do the FRP face sheets and aluminum stiles and rails keep the exterior of the door rust-free, but the foamed-in-place core locks out all moisture, so corrosion and other issues cannot attack from the inside out.

Hybrid FRP Doors

Pebble Grain | Sandstone | 6-Panel Wood Grain | Rustic Wood Grain | Contemporary Wood Grain

Heavy-duty yet lightweight FRP-faced door with aluminum stiles and rails, rugged tie rod construction, and injected high-density closed-cell foam core.

Aluminum Doors

When confronted with unrelenting environmental conditions such as high humidity or chemicals that quickly damage hollow metal doors, our aluminum flush door prevails.

Aluminum Flush Doors

Smooth | Fluted | Embossed

Heavy-duty yet lightweight aluminum-faced door with aluminum stiles and rails, tie rod construction, and injected high-density structural closed-cell foam core. Stainless steel door face options also available.

Shower and Bathroom Stall Compartment Doors

For walled compartments, we offer reduced-height (up to 36" x 60"), 1-3/4" Shower and Bathroom Stall Doors. These doors feature the same construction you know and love in our standard doors, only shorter! Shower and Bathroom Stall Doors are made to withstand hard usage, resist vandalism and maintain a like-new appearance.

Mount between two existing walls with our Aluminum Insert Frame, designed for use with a Concealed Continuous Gear Hinge. This combination can be applied directly to block masonry or a flush wall without the problem of the hinge cap rubbing on the wall. Other Fiberglass and Aluminum Framing attaching methods are available.

Shower and Bathroom Stall Doors withstand heavy usage, resist vandalism and maintain a like-new appearance.

- Ideal for high-abuse applications
- Long service life
- Attractive appearance
- Easy to maintain
- Injected closed-cell foam core

Before & After:

BEFORE: Exposure to liquids causes rust and creates sanitizing challenges. Metal panels have been bent and vandalized with permanent marker.

AFTER: The bathroom is renewed with ultra durable Special-Lite Bathroom Partitions. Easy to clean and no issues with rust or graffiti removal!

Why Choose Special-Lite?

Our approach to making doors, frames, and partitions is unique. We combine the best aspects of traditional hands-on craftsmanship, advanced materials, innovative design, and manufacturing technology to make the toughest, longest-lasting products possible.

Instead of making our products heavier and more rigid to make them tougher, we make them lighter and more flexible—so they can roll with the punches, kicks and whatever else life throws at them.

It may seem counterintuitive, but decades of enduring some of the toughest environments prove that it works. We stand behind our restroom products with a 10-year parts and labor warranty.
