

A Special-Lite Door will stay corrosion-free and secure for years to come, even in harsh environments (SL-17 Pebble Grain Hybrid FRP Door).

Solutions for **Port Authorities**

High-Performance Doors, Frames, and More

Keep your facility secure and efficient with durable Special-Lite® Doors and Frames!

We understand the importance of reliable and secure doors in port facilities, which is why we offer high-quality door systems designed to provide durability and longevity in even the harshest conditions. Ideal for cargo areas, warehouses, and other port facilities where safety and security are top priorities, Special-Lite® Doors come in a variety of finishes, and we customize them to fit your specific requirements.

Port Authority Facility Challenges

Doors and frames at Port Authority Facilities face a variety of challenges due to the nature of this environment:

1. **Corrosion:** Port authority facilities are exposed to saltwater and other corrosive elements, which can cause rust and deterioration of steel doors and frames, especially over time.
2. **Weather Resistance:** Ports face harsh weather conditions, such as high winds, heavy rain, and extreme temperatures.
3. **Security:** Port facilities require strict security to prevent unauthorized access and protect passengers, crew, and valuable cargo or equipment.
4. **Heavy Use:** Doors and frames at port authority facilities must withstand frequent opening and closing by personnel, vehicles, and cargo, which can lead to wear and tear, misalignment, and damage.
5. **Maintenance:** Doors that require significant maintenance or experience malfunctions or downtime disrupt port operations..

SL-19 Rustic Wood Grain Hybrid FRP Door (painted finish) and Aluminum Framing - Lahaina Harbor Ferry Terminal, Maui, Hawaii

Choose Solutions Designed for Your Facility

These challenges highlight the importance of choosing high-quality doors that are specifically designed for this environment. Doors and frames at Port Authority Facilities require careful consideration and planning to ensure they withstand harsh environments and heavy use. Special-Lite® Commercial Doors provide reliable performance, security, and safety.

Doors & Frames for Port Authorities

Keep your facility functional and secure without spending hours on door and frame maintenance, repair, or refinishing!

Our doors and frames are remarkably durable; we designed them to endure the heavy use and abuse your facility experiences. They're perfect for corrosive environments that quickly damage steel doors and frames. Keep your facility operating at peak efficiency while minimizing security threats and maintenance costs, as well as reducing energy usage.

Why choose Special-Lite?

- Durability:** Our doors and frames are designed to withstand harsh environments where doors are exposed to saltwater and other corrosive elements. They are resistant to rot, warping, and cracking, making them ideal for high-traffic areas.
- Weather Resistance:** Our doors are highly resistant to wind, rain, and extreme temperatures, making them ideal for use in coastal areas where traditional doors may deteriorate.
- Low maintenance:** Special-Lite Doors require minimal maintenance compared to traditional steel or wood doors. They don't require painting, are resistant to corrosion, and are easy to clean.
- Energy Efficiency:** Our doors have excellent insulating properties, which can reduce energy consumption and lower costs.
- Security:** Select doors that can resist impacts, vandalism, and break-ins, helping to ensure the safety and security of your port facility.
- Customization:** Choose from a wide range of colors, finishes, and hardware to match your facility's aesthetic and functionality.
- Warranty:** Experience peace of mind with an uncomplicated, 10-year, 100% parts & labor warranty.
