

*Special-Lite Fiberglass Doors and Frames are FDA and USDA cGMP Compliant.*

## Solutions for **Food Production Facilities**

### **High-Performance Doors, Frames, and More**

Keep your facility in optimal condition with Special-Lite® Doors and Frames!

If you operate a food processing facility, you understand the significance of having doors and frames that can endure the constant exposure to moisture, chemicals, and rigorous use. Special-Lite® Doors and Frames are crafted using top-tier materials and engineered to withstand the challenging and humid conditions commonly found in food production settings.

## **Food Production Challenges**

Doors systems in food production facilities encounter a range of challenges unique to this environment:

- 1. Moisture & Corrosion Resistance:** Food processing areas generate substantial moisture, which can lead to water damage and mold growth on surfaces ill-suited for this environment. The wet and often humid conditions can result in corrosion.
- 2. Sanitation & Hygiene:** Your facility requires regular chemical treatment, cleaning, and maintenance to ensure proper function and hygiene. Surfaces need to facilitate easy cleaning and sanitizing.
- 3. Security:** Access control is necessary to prevent unauthorized entry. Doors must be secure to prevent unauthorized access to areas such as production zones and storage rooms.
- 4. Compliance:** Food production facilities are subject to strict regulations regarding hygiene, safety, and sanitation. Doors and frames must meet these regulatory requirements.

## **Choose Solutions Designed for Your Facility**

These challenges underscore the importance of selecting high-quality doors and frames specifically designed for food production facilities, where some traditional door and frame materials can deteriorate rapidly. By collaborating with experts who comprehend these unique challenges, you can ensure that your doors provide dependable performance, security, and safety while meeting your hygiene, moisture resistance, and access control requirements.

*Our Concealed Card Reader option can add an additional layer of security.*

## Doors & Frames for Food Production

Engineered to endure the challenging and humid conditions typical in food processing, Special-Lite Doors and Frames are constructed from top-notch materials that resist moisture and water damage. Sturdy and capable of withstanding heavy usage, they offer security and ease of access while maintaining a hygienic environment. Whether you're planning a new food production facility or renovating an existing one, our doors and frames are the ideal choice.

### 10 Reasons to Choose Special-Lite Doors and Frames:

- 1. Moisture Resistance:** Our doors and frames are highly resistant to moisture and water damage. They are ideal for use in humid and wet environments, such as processing areas.
- 2. Corrosion Resistance:** Our doors and frames will not rust, even with repeated exposure to moisture and chemicals.
- 3. Durability:** Our doors and frames are incredibly durable and can withstand heavy use and abuse, ensuring longevity and reliability in your facility, even in high-traffic areas.
- 4. Low Maintenance:** Our products are designed for minimal maintenance, reducing ongoing costs and saving time.
- 5. Hygiene:** Our doors and frames are designed with hygienic materials and finishes that are easy to clean and sanitize. Complete your hygienic door system with our flush vision panels, available with or without operable privacy blinds.
- 6. Energy Efficiency:** Special-Lite Doors and Frames are available with excellent insulation properties, to help maintain required temperatures while reducing energy consumption.
- 7. Security:** Lightweight and easy to operate, our doors are engineered for protection when locked. They are reinforced for secure hardware attachment and compatible with access control systems to prevent unauthorized entry.
- 8. Customization:** Special-Lite Doors and Frames can be tailored to fit your project's requirements, with various colors and finishes to match your facility's design.
- 9. Compliance:** Special-Lite Fiberglass Doors and Frames are FDA and USDA cGMP compliant.
- 10. Warranty:** Enjoy peace of mind with a straightforward 10-year, 100% parts & labor warranty, and a limited lifetime warranty against corrosion.
