## RELIABLE DOORS, UNRIVALED SUPPORT

Special-Lite® Double-Acting Traffic Doors are built to last. Inspired by our Aluminum Flush and Hybrid FRP Doors and Bathroom Partitions, these doors inherit a legacy of reliability with more than 300,000 cycles of performance testing.

Our lightweight door panel is constructed with close-cell foam injection technology for moisture and corrosion resistance, with an exclusive stainless steel double-acting gravity pivot hinge.

Available in a wide selection of attractive, easy-to-clean and sterilize FRP, Aluminum, or Stainless Steel door face options, with many ways to customize. These doors are ideal for applications such as restaurants, retail, and other high-traffic areas.

### Robust & Lightweight Construction

Our exclusive waterproof, high-density injected foam core binds all components, creating an integral door face with an aluminum perimeter that provides superior strength while remaining lightweight.

### Design Options

Customize your doors with a wide variety of door panel finishes, TVP Gasket Vision Lite Kits with acrylic windows, and accessories like push plates, kick plates, and more.

### Best-In-Class Support

We are your one-source solution for door, frame, and bathroom partition needs, supporting you every step of the way with 3D installation instructions, training, as well as in-person and phone support.
