

# Dual Glazed LiteSpace®

## Demountable Glass Wall System

Find out more:

The Dual Glazed LiteSpace system offers a sophisticated and high-performance solution for modern interior environments where sound insulation and aesthetic appeal are paramount.

Designed with sleek, minimal profiles, this dual-glazed variation maximizes natural light while providing exceptional acoustic separation. Innovative snap-in profiles allow for easy installation and demounting. This flexibility not only supports changing layout needs but also simplifies maintenance and upgrades.

The system is installed into finished openings and the use of high-quality aluminum ensures durability and longevity.

### Acoustic Privacy

Protect privacy, confidentiality, and reduce noise transmission with configurations up to STC 47. Ideal for office fronts, conference rooms, and other shared spaces where maintaining a quiet, focused atmosphere is essential.

### Versatile and Customizable

Choose from dual-glazed aluminum stile and rail doors to coordinate with your system or another door of your choice. A wide variety of finish options, including custom colors, are available to complement your vision.

### Easy, Flexible Installation

Measured and cut onsite for the ultimate field flexibility, this system is designed for finished openings. It features innovative base setting channels and snap-in profiles for quick and easy installation.
