

ALUMINUM FRAMING

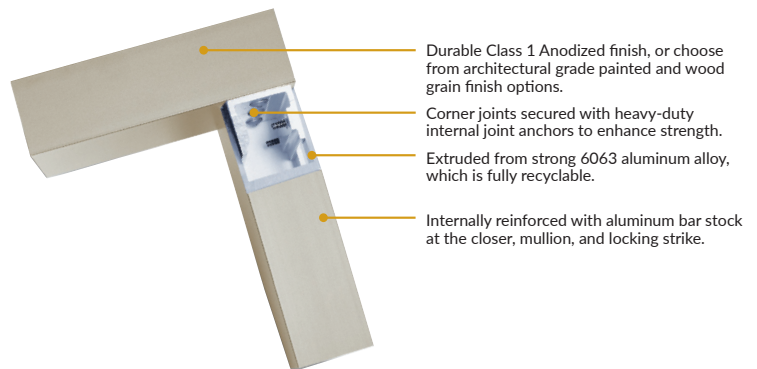

Your durable, long-lasting doors deserve durable, long-lasting frames. Special-Lite® Aluminum Framing combines the highest quality materials with proven designs and hands-on craftsmanship. Our durable, custom framing harmonizes with the design of your building and complements our long-lasting doors.

HEAVY-DUTY FRAMING for trouble-free entrances

The frame is the foundation of any entrance. It must securely hold the entrance system's components in position to keep doors and hardware operating correctly without needing constant adjustment and repair. Numerous issues commonly associated with entrances stem from frame-related problems rather than the doors.

At Special-Lite, we combine the highest quality materials with proven designs and hands-on craftsmanship to produce durable, sustainable, made-to-order Aluminum Framing with a variety of profiles and custom options available. With so many framing options to choose from, you can specify the perfect frame for your application.

To ensure the highest quality, correct fit, and reliable performance, every frame is prefabricated to your specifications and fully assembled at the factory with minimal knock-down for shipment. It will arrive ready to install with an easy-to-use internal clip system.

The Advantages of Special-Lite® Aluminum Framing:

- **Durability:** Manufactured from strong 6063 aluminum alloy, our heavy-duty frames are designed for high traffic areas.
- **Low Maintenance:** Aluminum resists corrosion, scratches, dents, graffiti, and other damage. It doesn't require painting and repainting like steel, only routine cleaning with mild soap and water to maintain a great appearance.
- **Sustainability:** Our aluminum is sourced from reprocessed aluminum alloy and can help earn recycled material credit for LEED standards.
- **Customization:** Custom-made to exact requirements. Curves and special shapes are our specialty. Our wide variety of high-performance Anodized, Painted, and Wood Expressions Finish options help make your architectural vision a reality.
- **Compatibility:** To ensure high quality workmanship, correct fit, and reliable performance, every frame is fully assembled at our factory with minimal knock-down for shipment.
- **Warranty:** Experience peace of mind with a 10-year, 100% parts & labor warranty and a limited lifetime warranty against corrosion, failure of corner joinery, and more!

Flush Glazed Framing

Flush Glazed Framing can be used where slimmer sight lines are important. Internally reinforced with aluminum bar stock at the closer, mullion, and locking strike attachment point to reduce metal fatigue and prevent component loosening.

SL-1030 SL-1031 SL-1032 SL-1034 SL-70

Retrofit Framing

Special-Lite® Insert Frames and Capping are an ideal solution for maintaining building integrity during historic preservation projects. A great option for renovations when replacing old framing.

SL-450TB SL-600TB

Thermally Broken Framing

Thermally Broken Framing provides thermal performance that matches or exceeds the thermal performance of glass which helps save you money and energy.
