ANODIZED ALUMINUM FINISHES & TEXTURES

Explore high-performance, durable, anodized aluminum finishes for Doors, Frames, Sliding Door Systems and Glass Partition Walls, as well as texture options for Aluminum Flush Doors. Customize to fit your needs.

Anodized Aluminum Finishes

Choose an anodized finish that will look beautiful for years to come. We offer nine Anodized Aluminum finishes. Aluminum face sheets, door extrusions, and framing are available in the colors shown. Anodizing is highly durable and provides benefits like corrosion resistance. Anodized aluminum won't chip, flake, peel, or chalk.

Aluminum Face Sheet Textures

We offer three texture options for your aluminum face sheet, these textures allow you to better coordinate with existing architecture, create a different feel to your space, and add more variation to a standard door. These textures can also be anodized in one of our standard colors.

Finish Samples

Finish samples are available in the colors and textures shown. Textured face sheets are available in any stock or optional anodized color. Aluminum extrusions and face sheets can also be painted, please reference our Painted Finishes Brochure for more information on paint selections. To order samples, scan the QR code on the back of this brochure.
