

National Account Solutions

Solve the Doors That Fail First, Then Standardize the Rest.

Most National Account partnerships begin with one door—the one that rusts, gets abused, creates security risks, or keeps getting replaced. Special-Lite is the trusted partner organizations rely on to solve their most challenging, high-risk entrances first, proving performance where it matters most, then scaling into a consistent door program across all locations. We build programs for brands with multiple locations that require reliability, accountability and long-term consistency.

 Rustic Wood Grain Hybrid FRP Doors (SL-19)

Reliable Solutions. Dedicated Leadership.

Dedicated Director of National Accounts

Every National Account is supported by a dedicated Director of National Accounts, providing centralized leadership and a single point of accountability at the manufacturer level.

Layered Support Model

Your program is supported by manufacturer leadership, trusted distribution partners, and local sales representatives—working together with no gaps.

Designed for Scale

From one problematic back door to hundreds of standardized openings, this program grows with your footprint.

What National Accounts Programs Cover

Back of house to front of house—one coordinated program:

- Corrosion-prone areas
- High-abuse back doors
- Security-challenged entrances
- Service and delivery entrances
- Front entrances and other customer-facing doors
- Double-acting traffic doors
- Interior doors and frames
- Restroom doors, frames, and partitions
- Reduced-height doors for stalls or front counter access

We've worked with these brands and more:

 National Accounts Program:

Why National Brands Work With Special-Lite?

Consistency at Scale

Standard products, finishes, and hardware across every location.

Durability Where It Matters

Doors engineered to outperform hollow metal and wood doors in demanding environments.

Predictability

Consistent pricing, lead times, and product availability.

Brand Alignment

Custom colors, finishes, and more to support customer-facing branding.
