

OEM Account Solutions

Built for Your Product. Backed by Manufacturing Expertise.

Most OEM partnerships begin when door manufacturing becomes a bottleneck—slowing production, creating inconsistency, or pulling focus away from core products. Special-Lite is the partner manufacturers rely on to design and deliver custom, commercial door systems that integrate seamlessly into their product and production process. We help prefabricated structure manufacturers improve efficiency, maintain consistency, and scale with confidence.

Reliable Solutions. Dedicated Leadership.

Engineered for Your Application

Every OEM program is built around your product—not a standard catalog. We collaborate with your team to develop door and frame solutions that meet your exact requirements.

Predictable Manufacturing Support

Agreed-upon lead times, priority scheduling, and consistent production help keep your operation running smoothly.

Designed to Scale

From mock-ups and pilot builds to full production, our OEM programs are built to grow with your business.

What Our OEM Programs Cover

Designed to integrate directly into your manufacturing process:

- Prepped or prehung door assemblies
- Pre-installed hardware
- Specialized insert frame solutions
- Custom sizes, configurations, and finishes
- Doors engineered for modular and mobile environments
- Durable, corrosion-resistant solutions
- Standardized configurations for streamlined production
- Stock and bulk order programs

We've worked with manufacturers of:

- Modular Buildings
- Mobile facilities and trailers
- Healthcare and specialty units
- Equipment enclosures and utility structures

OEM Program:

Why OEMs Work With Special-Lite?

Focus on What You Build

Outsource door manufacturing so your team can focus on core products and production.

Consistency at Scale

Dependable quality across every unit and production run.

Flexible Programs

Support for mock-ups, pilot runs, and high-volume manufacturing.

Integration Support

Solutions designed to fit your workflow, installation process, and product design.
