

SpecSlide®

Bi-Parting Surface-Mounted Sliding Door System

Find out more:

Flexible Solutions for Large Openings

The SpecSlide Bi-Parting Configuration expands the versatility of the durable SpecSlide system by providing an elegant solution for wider openings.

Available with either synchronous belt-drive or independent operation, this option delivers exceptional flexibility while maintaining the clean aesthetics and space-saving benefits of a surface-mounted sliding door.

Ideal Applications

- Conference Rooms
- Training Spaces
- Hospitality Environments
- Corporate Offices
- Education Facilities
- Multi-Purpose Rooms

Solves Large Openings

Ideal for applications where wider clear openings are desired without the space requirements of traditional swing doors.

Two Operating Options

Choose between synchronous belt-drive operation for simultaneous door movement or independent operation for maximum user flexibility.

Elevated Design

Concealed hardware, clean lines, and square or sloped fascia options create a sophisticated architectural appearance.
