

CONFIGURATION WORKSHEET

Model: SL-17

PRODUCT LIMITATIONS

Test: ASTM F1642-04

Average Peak Reflected Pressure: 6.1 psi

Average Positive Phase Impulse: 45 psi-msec

Average Positive Phase Duration: 15 msec

Hazard Rating: Minimal Hazard

Post Test Operability: Operable

Max Size: 36 in. x 84 in. Single Door (Max D.O.)
72 in. x 84 in. Double Door (Max D.O.)

Vision Lites: Max 21-1/2" x 32"

Product Description:

The SL-17 FRP Door, installed in an aluminum or fiberglass door frame, is our most popular product. This comes as no surprise because the SL-17 solves door maintenance and standard door replacement problems just as it was designed to do in 1983 for educational institutions!

Design Guidelines:

- Compatible with most blast rated hardware.
- Requires blast rated glazing.
- Rating only maintained when installed in aluminum tube framing by Special-Lite.
- Side-lites and transoms not tested.
